## WHAT IS CLAIMED IS:

1. A method for trading a plurality of derivative financial instruments over the Internet, comprising:

receiving a first order to buy a derivative financial instrument that selectively represents a movie or a movie talent in an entertainment industry, said movie corresponding to a stock and said movie talent corresponding to a bond for trading over the Internet;

receiving a second order to sell said derivative financial instrument; setting a market price based on the received first and second orders; and executing a trade at the set market price.

- 2. The method according to claim 1, further comprising setting a price for a new stock offering on the basis of a potential box office revenue for a movie represented by said new stock offering.
- 3. The method according to claim 1, further comprising setting a price for a new bond offering on the basis of a talent's popularity rating in the entertainment industry, such that one bond representing one talent with a low popularity rating is issued with a higher yield than another bond representing another talent with a high popularity rating.
- 4. The method according to claim 1, wherein the set market price is represented by electronic currency.
- 5. The method according to claim 4, further comprising debiting a first account controlled by a first

trader who issued said first order in the electronic currency for the executed trade, and crediting a second account controlled by a second trader who issued said second order with proceeds in the electronic currency for the executed trade.

- 6. The method according to claim 5, wherein the electronic currency is Hollywood dollars.
- 7. The method according to claim 1, wherein the set market price reflects a current production status of said movie.
- 8. The method according to claim 1, wherein the set market price is indicative of the traders' interest in said movie such that a potential box office revenue for said movie may be predicted far in advance of the movie release.
- 9. The method according to claim 1, wherein the set market price is indicative of the traders' interest in said talent such that a potential box office revenue for said movie may be predicted far in advance of the movie release.
- 10. A system for trading a plurality of derivative financial instruments over the Internet, comprising:

means for receiving a first order to buy a derivative financial instrument that selectively represents a movie or a movie talent in an entertainment industry, said movie corresponding to a stock and said movie talent corresponding to a bond for trading over the Internet;

.

means for receiving a second order to sell said derivative financial instrument;
means for setting a market price based on the received first and second orders; and
means for executing a trade at the set market price.

- 11. The system according to claim 10, further comprising means for setting a price for a new stock offering on the basis of a potential box office revenue for a movie represented by said new stock offering.
- 12. The system according to claim 10, further comprising means for setting a price for a new bond offering on the basis of a talent's popularity rating in the entertainment industry, such that one bond representing one talent with a low popularity rating is issued with a higher yield than another bond representing another talent with a high popularity rating.
- 13. The system according to claim 10, wherein the set market price is represented by electronic currency.
- 14. The system according to claim 13, further comprising means for debiting a first account controlled by a first trader who issued said first order in the electronic currency for the executed trade, and means for crediting a second account controlled by a second trader who issued said second order with proceeds in the electronic currency for the executed trade.
- 15. The system according to claim 14, wherein the electronic currency is Hollywood dollars.

- 16. The system according to claim 10, wherein the set market price reflects a current production status of said movie.
- 17. The system according to claim 10, wherein the set market price is indicative of the traders' interest in said movie such that a potential box office revenue for said movie may be predicted far in advance of the movie release.
- 18. The system according to claim 10, wherein the set market price is indicative of the traders' interest in said talent such that a potential box office revenue for said movie may be predicted far in advance of the movie release.
- 19. A computer-readable storage medium for storing program code means for, when executed, causing a computer to perform a method for trading a plurality of derivative financial instruments over the Internet, the method comprising:

receiving a first order to buy a derivative financial instrument that selectively represents a movie or a movie talent in an entertainment industry, said movie corresponding to a stock and said movie talent corresponding to a bond for trading over the Internet;

receiving a second order to sell said derivative financial instrument; setting a market price based on the received first and second orders; and executing a trade at the set market price.
